Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Receipt of applicant's amendment is acknowledged and entered as Paper # 8, claims 1-10 are pending and claims 3 and 7 have been withdrawn from consideration.

Response to Arguments

Applicant's arguments filed 1/2/2003 have been fully considered but they are not persuasive.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1,2,4-6 and 8-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. As regarding claim 1, the claimed subject matter of "a divider disposed within said chamber and adjacent said first surface" is not described in the original disclosure. It appears in figure 3, that the divider is apart from the first surface by a flow channel (135).

Claims 1-2,4-6 and 8-10 are further rejected as can be best understood by the examiner.

Claim Rejections - 35 USC § 102

Art Unit: 3743

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1,2,4-6 and 8-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Batchelder (US 6,019,165). Batchelder discloses (figures 2,7,8 and column 7, lines 16-19) a liquid heat sink comprising a base (20) having a first and a second surfaces (24,26), a plurality of fins (28) extending from the second surface (26); a chamber (50) disposed between the first and second surface of the base; a divider (208,210), which has a plurality of flow dividers (222,224,226) extending from a first surface of the divider, disposed within the chamber (50) between the first surface and the second surface of the base; a cooling fluid such as water disposed within the chamber (50); a pump (54) proximate top edge of the base (edge formed by the second surface (26)); and a fan (30) attached to the fins (28). Batchelder further discloses (figure 2) an inlet of the pump being proximate the first surface (24) of the base (tapered shape near fins (52)); and an outlet of the pump that pumps water over a first surface of the divider.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 3743

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
